

Separate on-call (a.k.a jour) for extra weekends & big weekends

Mock-up example:

When configuring big weekends/extra weekends

you get the option to create custom on-call times for that weekend.

Features

1. Optional, need to be able to toggle on/off – default to OFF
2. Customizable per extra weekend/big weekend
3. If custom on-call is added. If the normal on-call for that customer shows up outside the interval use that on-call type (example below).

Example for 3.

	Monday	Tuesday	Wednesday	Thursday	Friday	Saturday	Sunday
OB				1800 → Big weekend [OB]	Bigweekend [OB]	Bigweekend [OB]	Bigweekend ends [OB]->07
On-call				18-22** 22 → on-call bigweekend	→ 07 22->	->07 22->	→ 06 06-07 **

** If normal weekend/weekday on-call time continues here that should apply.
